## 1. Location:

The tractor spare parts plant is about 1,500 feet from the acute angle formed by the Volga River and the mouth of the Samara River (for location see Annex).

## 2. Plant installations:

The official designation of the plant, an old installation, is ATD; it is about 1,200 x 450 feet. New constructions or expansions were not observed. (see Annex 2)

## 3. Work force:

According to Soviet statements, 3,000 to 4,000 workers in three shifts.

## 4. Production:

Tractor spare parts, including connecting rods, valves, bolts, and instruments.

## 5. There is a large concrete storage building, 480 x 90 feet, about 900 feet west of the plant. The storage installation proper has 120 silos grouped in 20 rows of six silos each; its total size is 450 x 90 x 180 feet. A tower-like structure, 90 x 30 x 240 feet, with elevator facilities extending to the river and mill No 2 and equipped with hoisting facilities and scales, is on the northern side. From there the grain is taken to the silos on three conveyor belts. According to Soviets, the silos have a total storage capacity of 500,000 tons. All the silos were filled with wheat in March 1949 (see Annex 3).

25X1A Comment:

The report confirms and supplements a previous report. The attached sketch deviates only in minor points from that accompanying the

previous report.

The location of the plant is stated correctly on the attached sketch (see town map of KUIBYSHEV of 15 March 1944).

Details on the grain storage facilities in KUIBYSHEV were reported for the first time.

3 Annexes:

1. Location of "Traktordetal" Plant and Grain Storage Facilities in KUIBYSHEV.
2. Installations of "Traktordetal" Plant in KUIBYSHEV
3. Panoramic Sketch and Plan View of Grain Silos in KUIBYSHEV.
